

**50%** of the energy in Europe is used for **heating and cooling buildings** most of which comes from fossil Fuels

The **building sector** can be **completely decarbonised**

100% RES

Energy demand needs to be reduced **whilst supply is decarbonised**

Good energy policy addresses the system as a whole

**Fossil fuels are still subsidised in Europe** distorting the market and suffocating renewable energy

Allowing **renewables for Heating and Cooling** to become **competitive** would mean a secure, clean future

# Decarbonise the building sector to decarbonise Europe

## Stop subsidising fossil fuels and let renewables become competitive

Co-funded by the Intelligent Energy Europe Programme of the European Union
