

Capacity Building Actions – PORTUGAL

Background

Following what was established in Annex I of the FRONt proposal, ADENE carried out 2 capacity building actions in 2 different regions of the country, Great Lisbon area and Great Porto area.

It was quite clear that the actions were carried out using the synergies of the training sessions for RES-HC installers of the Build UP Skills project. The sessions were carried out on the last day of the training sessions on the installations of VET-providers.

Participants

The sessions were based on the outcomes of WP2 (Integrated support schemes for RHC). In fact, most of the participants are company owners or high level managers in their organisation. Most of participants are involved in home rehabilitation, been responsible for the heating and cooling infrastructures. These professionals are the last on the long chain of contacts of heating supply.

Lisbon Session

Porto Session

The first session took place in **Lisbon**, on September 29th, and had the following participants:

1. Albino José Peixoto Rocha
2. António Filipe Esteves Garcia Fernandes
3. Artur Ribeiro
4. Bruno Miguel Duarte Mourão
5. Bruno Tiago Moreira Leal
6. Diogo Manuel Ramos Botelho Teixeira
7. Jorge Francisco Azevedo Fernandes
8. José Fernando Carvalho de Almeida
9. José Miguel Correia Macedo da Silva
10. Paulo Jorge Barros Barreira
11. Paulo Jorge da Costa Pinheiro
12. Tiago Raimundo Ruivo Pereira

The second session took place in **Maia (Porto)**, October 20th, and had the following participants:

1. Amaro Piteira Lopes
2. António João Nelas Rodrigues
3. Bruno Miguel Almeida Pinto
4. Hugo Manuel Lopes de Sousa
5. Joaquim Luís Leote Rico Fonseca
6. Jorge Miguel Rodrigues Costa Lourenço
7. Nuno Renato Pinto da Silva
8. Oleksandr Chopyk
9. Tiago Joel Pimenta de Freitas
10. Victor Manuel Rei Martins Amaral

Topics Discussed

The sessions started with the presentation of the FRONt project and covered the following topics:

- WP2 - Integrated support schemes in the country & summary of the results
Oral presentation by S Spencer
- WP4 - Market facilitators - Presentation of the end user centred tools
Oral presentation by S Spencer

Issues related to how support schemes that have been implemented in the country were fully discussed and the recommendations of the FRONt project, presented in the Manual, were also presented.

In fact the participants were able to relate the issues been discussed with the running support scheme called “**AVISO20**”, which co-financed some of the active RES-HC systems namely, solar thermal, biomass and heat pumps.

Links to the FRONt web-page were also shown with indication of various documents that the participants were invited to acquire.

After the presentation, the participants had a chance to ask questions that were fully clarified.

Conclusions

The provided information was well received and the installers can have a more constructive role to play and more reliable information to circulate to their costumers.

Adene will continue to use this opportunity, training of professionals, to divulge the results of the project, including the web-site and the deliverables.

FAIR RENEWABLE HEATING AND COOLING OPTIONS AND TRADE – FRONt
