

What policy priorities to become number one in renewable heating and cooling?

Gabriela Prata Dias

EUSEW, Brussels, 15 June 2016

ADENE - Portuguese Energy Agency

Government related agency, working mainly on energy efficiency and renewable energy

Mission

“To promote and perform activities of public interest in the field of energy and its related sectors”

AGÊNCIA PARA A ENERGIA

Core competences

- Policy implementation
- Programme development
- Market monitoring
- (Big) Data management
- Technical assistance
- Dissemination & Promotion

Certificação Energética
e Ar Interior
EDIFÍCIOS

Summary

- ✓ Level playing field for Renewable H&C in EU
- ✓ Identifying Strategic Policy Priorities
- ✓ Effective support schemes for Renewable H&C
- ✓ Clear and transparent communication with European consumers

Partners

European Trade Associations:

Energy Agencies:

Experts:

Addressing Barriers

- ✓ Financing
- ✓ Lack of awareness
- ✓ Market conditions
- ✓ Lack of strategic priorities and governance

Financing

Recommendations

✓ Promote existing support and new financing opportunities

✓ Support schemes financed 'off-budget' – long term perspective

✓ Streamline administrative procedures related to support schemes

Awareness

Recommendations

- ✓ Dissemination and training

- ✓ Highlight the heating system performance and costs in EPC

- ✓ Promote district heating (DH) and the use of RES in DH

Market conditions

Recommendations

- ✓ Phase out fossil fuels subsidies and use in new and existing buildings

- ✓ Improve building codes (NZEB standard)

- ✓ Long term renovation strategies

Strategic priorities

Recommendations

✓ Long-term decarbonisation roadmap

✓ Improving data collection and reporting

✓ RD&I in renewable heating & cooling technologies

Thank you!
